software engineering management for productivity and quality - software engineering management for productivity and quality k. s. white, jefferson lab, newport news, va, usa abstract since the advent of electronic computers, people have struggled to develop effective software engineering processes. while these processes are similar to those used by hardware engineers, the software industry has earned a **quality requirements checklist - the journal of object ...** - adequately specify the quality requirements that software engineering institute (sei) architects have developed the quality attribute workshop (qaw) to identify and document these critical architectural drivers [sei 2005]. it is also a major reason why the sei's atam method begins with steps designed to ensure that the architecturally- **quality models in software engineering literature: an ...** - quality models in software engineering literature: an analytical and comparative study rafa e. al-qataish, phd al ain university of science and technology - abu dhabi campus, po box: 112612, abu dhabi, uae. rafa@ieee abstract: the quality of the software is critical and essential in different types of organizations. in some types of **software quality and standards - school of informatics** - cost/benefit tradeoff making changes to improve software quality requires time and money to: ••spot the problemisolate its source ••connect it to the real causefix the requirements, design, and code ••test the fix for this problemtest the fix has not caused new problems •change the documentation for a given change to make sense, the improvement **introduction to software engineering - psu** - software engineering management software engineering processes software engineering tools and methods software quality question: where does programming all these are covered on the ieee csdp exam fit in? programming vs software engineering programming software engineering programming without software engineering is just hacking **software quality & systems engineering program quality ...** - software quality & systems engineering program quality assurance checklist the following checklist is intended to provide system owners, project managers, and other information systems development and maintenance professionals with guidance in identifying and planning quality assurance (qa) activities. **from quality assurance to quality engineering - qai quest** - closely aligned with idt's mission of designing, building and enabling quality software. i know you share that objective if you are here. the theme of this year's conference, from quality assurance to quality engineering, articulates the goal many of us have for our work every day. as software **an overview of ieee software engineering standards and** - asq section 509 ssg meeting, 8 november 2000 paul r. croll - 2 objectives i provide an introduction to the ieee software engineering standards committee (sesc) i provide an overview of the current state and future direction of ieee software engineering standards and knowledge **basic principles and concepts for achieving quality** - software engineering institute | 7 1 introduction this technical note describes an extended quality conceptual framework (eqcf), which represents, as the name implies, an extension to the software quality framework (sqf) devel-oped initially in 1982 [baker 1982a, baker 1982b]. the goal of the sqf was to place quality in **metrics for requirements engineering - umu** - software quality depends on several factors such as on time delivery, within budget and fulfilling users needs. quality should be maintained from starting phase of software development. requirements management play an important role in maintaining qual-ity of software. software quality can be maintained by checking quality attributes in **software quality assurance plan - department of energy** - the purpose of this software quality assurance plan (sqap) is to define the techniques, procedures, and methodologies that will be used at the center for space research (csr) to assure timely delivery of the software that meets specified requirements within project resources. **fitness software design quality - university of toronto** - van vliet, h.
